This Resource Directory was developed in 2008 and revised in 2010 for informational purposes only by the Senior Resource Team of the Orange Senior Leadership Program. It is meant to be a comprehensive, (but not all-inclusive) guide to opportunities, care and support services that allow older Orange residents to remain in their own homes/community, for as long as possible, avoiding unwanted and unnecessary institutionalization, and to age in place with dignity and respect.

DISCLAIMER

Where appropriate, at least two-to-three providers have been listed, giving priority to those public and not-for-profit agencies that provide services in Orange and the immediate surrounding area. While every effort was made to verify the credentials and quality of the services and/or providers, the Town of Orange and the Senior Leadership Program disclaims any responsibility for adverse occurrences and recommends patrons of services verify the credibility, license/registration and insurance of those providers. See Appendix A for a listing of licensing/registration and advocacy agencies.

APPENDIX D:

Disposal of Medications— How to Dispose of Prescription Medicines and Over-the-Counter (OTC) Products

Flushing medications down the toilet or sink causes water pollution, impacts drinking water and has adverse effects on septic systems, fish and other aquatic wildlife.

The safe way to dispose of medication and OTC products is to put them in the trash.

Here's how to do it:

1. Keep the medication in its original container.

- To protect privacy and discourage misuse of the prescription, cross out the patient's name with a **permanent marker or duct tape or remove the label.** (Chemotherapy drugs may require special handling. Work with your healthcare provider on proper disposal options for this type of medication.)

2. Modify the medications to discourage consumption.

- **For solid medications:** such as pills or capsules—add a small amount of water to at least partially dissolve them.
- **For liquid medications:** add enough table salt, flour, charcoal or nontoxic powdered spice, such as turmeric or mustard, to make a pungent, unsightly mixture that discourages anyone from eating it.
- **For blister packs:** wrap the blister packages containing pills in multiple layers of duct or other opaque tape.

3. Seal and conceal.

- Tape the medication container lid shut with packing or duct tape.
- Place it inside a non-transparent bag or container such as an empty yogurt or margarine tub to ensure that the contents cannot be seen.
- **Do not** conceal medicines in food products because animals could inadvertently consume them.

4. Discard the container in your trash can. *Do not* put the container in your recycling bin!

5. For needles, syringes, lancets and other sharp objects:

Discard used sharps in a hard plastic or metal container, such as liquid laundry detergent or fabric softener or metal coffee can with a screw-on or tightly secured lid. Put a small amount of liquid bleach in the container. Keep covered. When $\frac{3}{4}$ full, seal the cover with duct tape and place in **trash bin, NOT RECYCLING!**
